TO MONITOR SALES ACTIVITY
& DEVELOP SALES ANALYSIS

- Efficient reporting/dashboard
- Activity tracking (tooling, dvpt cost...)

CRM (Customer Relation Management)

UNIQUE CUSTOMER DATA
BASIS

- For customer relationship
- Project management

Uniform process for all
Customers

Information is centralised
shared and capitalized

Time saving as
Administrative task
automatized,

Up to date tool to make
projection and simulation

Added value in structuration ->
development of Sales Planning

- Automatic Sales performance extract
 - Formal margin follow up
 - Link and follow up from TMA to order
- Lead to efficient reporting
(MSAP / MZK /BUDGET....

Daily relationship improved with Customers
Reactivity reinforced

Companies involved

- In Mind Cloud
 - Software Solution Provider
 - Standard & Customization
 - Custom Software Extension
 - Document Requirements
- Itelligence
 - Project Management
 - Workshop Management
 - SAP Expertise
 - Intermediate between In Mind and JTEKT

Next Steps

Scope: Process View

Example

- Global story: « Change of connector supplier on current Clio production, part reference N°690000001 » With a part price decrease in 2 steps on current part price 100€ based on contract N°1000 index0:
 - First step: partial price down
 - Second step: after test cost depreciation second price down

Clio annual production volume											
January	February	March	April	May	June	July	August	September	October	November	December
2000	2000	2000	2000	2000	2000	2000	2000	2000	2000	2000	2000

1. Account Management opportunity

- Internal cost + technical description upload : -1€
- Quotation proposal setup:
 - Technical application: 01/06/2016
 - Price down at 01/02/2016: -0.2€
 - Test cost from 01/12/2016: 4 000€ depreciated on part price with 10% financial fees depreciated on 14 000parts=-0.25€

2. Quote creation and Product Selection

- Margin threshold: 50%
- List price calculation

3. Approval Workflow

- Price down Approval
- Technical Approvals

Approval Process

4. Proposal and Contract Management

- Quotation production with technical proposal
- Contract review
- Contract Generation

5. Opportunity Closure

- Order N°1000 index1 revision upload from Web portail
- Order VS offer check & Validation
- Reporting synthesis of account of price evolution on the year and export it

Before

After

Price upload in SAP

Next Steps

Critical Success Factors

Factors of success for a joint successful project

Goal orientation	<ul style="list-style-type: none">• The goals of the projects are the guidelines of all actions
Priority & Commitment	<ul style="list-style-type: none">• The attainment of milestones (target date and agreed quality) is the top priority• Appointed dates are obligatory and agreed services are to be performed on time
Team & Making progress	<ul style="list-style-type: none">• Based on your knowledge of requirements and our experience, together we will develop the best solution for your company
Sustainability	<ul style="list-style-type: none">• Workshops are to be prepared well and begin / end on time• The results are summarised, are made available for the team members and are obligatory
KIS – Principle	<ul style="list-style-type: none">• "Keep it simple": In the beginning simple solutions are implemented, which then can be increased in complexity later
Basic implementation	<ul style="list-style-type: none">• The standard functions are the basis, which will be adapted on your requirements. There will be no modifications.

Next Steps

Proposed Blue Print Workshops

Day 1- 3 : 29-05-2017 to 31-05-2017

Introducing Discussion

- Introduction + short demo
- Align project structure across account teams

2 - 3 Groups from Sales (each one day)

- Discuss Requirements Sales Process end-to-end
 - Requirements for general process
 - Specifics for different phases (LOI, development, pre-serial, serial)
- Align vocabulary used in CPQ
- Special topic: Applications of volume-based changes, depreciation
- Special topic: Approval Processes & Validation
- Special topic: Document Outputs
- Summary

Sales Department

G. Seror (RNPO)
P. Gautier (BMW)
C. Tiao (DAI / VW)
C. Mensah (PSA)
M. Grumelart (PSA)
T. Nakano (Toyota)
N. Yamashita (Toyota)

Summary Preparation for Different Groups

Introduction Session for Cost Planning & Control, Engineering, Accounting

Cost Planning & Price Application Process

- Discuss as-is and to-be process
- JASON
- Price Change Application & Compliance
- Outlook on sales administration

Accounting

C. Lefresne

Cost Planning

S. Roi

Cost Control

T. Bourderioux

Engineering Inputs

- Prototype
- Technical Documentation

Engineering

D. Pantale
A. Sarzier

Day 5: 02-06-2017

IT Department & In Mind Development

- Infrastructure & Integration
- Export/ Import ERP (prices)
- Special Topics, e.g. Part-Material Mapping

IT Department

C. Bertrand
Y. Carrel
F. Fort

Sales Process Summary from Different Groups

- Summary of commonalities
- Discussion and Conclusion

Sales Department

G. Seror (RNPO)
P. Gautier (BMW)
C. Tiao (DAI / VW)
C. Mensah (PSA)
M. Grumelart (PSA)
T. Nakano (Toyota)
N. Yamashita (Toyota)

Wrap-Up / Next Steps

Steering Committee (monthly)

- Overall responsibility for the whole project
- Approve project management plan
- Make project infrastructure available (project location)
- Approve changes to the project scope
- Provide active sponsorship for the project
- Approve and ensure resource allocation
- Authorise the project team to make decisions
- Approve and implement required organisational changes
- Approve, release and follow-up the project budget
- Continuously check and approve project progress
- Handling of escalated decisions, issues and change requests
- Approve completion of the project

Project Committee (weekly)

- Monitoring tasks in progress, deliverables, action plans and associated resources.
- Checking that the approach and procedures specified in the PQP are properly applied
- Operational management of the project.
- Budget monitoring, planning, resources
- Pre-validation of deliverables
- Identification of bottlenecks / Sticking points , their solution or their transfer
- Preparation of steering committees and synchronization of IT projects

Project Manager

- Control the scope of the project
- Plan and control all major project deliverables
- Identify and monitor risks
- Plan and control the project budget
- Plan and control the project duration and milestones
- Plan and manage the internal and external resources
- Plan and manage quality activities in the project
- Plan and execute communication activities
- Follow up on issues, decisions and change requests
- Travel management (hotel, flights, dinner etc.)

BPO : Sales process owner

- The Sales process owner is the person with responsibility for own business perimeter
- If changes to the current business processes are needed, the Sales process owner is the driver of such changes
- Must have a global view of processes in order to avoid sub-optimisation locally
- Shall push for use of global processes whenever possible instead of local variants
- Conceptual process design and decisions on request from the project teams
- Eventual escalation to Project Management when decisions cannot be taken without broader participation
- Ensure that the critical decisions get the needed buy in from the business units

Consultant (In Mind)

- Collect data and information
- Invite/ conduct meetings with representatives from the business when needed
- Ensure the quality of master data within own area and coordination of master data towards other groups in the project
- Customize, prototype and develop
- Create specifications for development
- Plan and conduct workshops
- Work out manuals and documentation
- Carry out tests
- Train key/end users
- Follow-up and report to project management
- Hyper care activities after go live

Key users (spec & testing)

- Assist the consultant/team lead in all aspects of the project according to description from consultant/team lead
- Key users are to share all their knowledge about as-is processes and desired to-be processes
- After go live for the key users :
 - Day-to-day support to end users
 - Review incidents and resolve where possible
 - Escalate incidents to a consultant when relevant
 - Monitor the individual end users
- In case of changes to the system after go live, the key users are responsible for testing before moving customizing to production
- Key users can also be trainer(s). Will be nominated later
